### Description of first aid measures

**After inhalation:** Unlikely route as liquid is impregnated on a towel, minimizing exposure via this route. If overexposed move to fresh air. If symptoms develop seek medical attention.

**After skin contact:** None usually required. Wash with water and soap and rinse thoroughly. If irritation persists, call a physician.

**After eye contact:** Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.

**After swallowing:** Not a likely exposure route. If a large quantity of liquid is swallowed, do not induce vomiting, call a physician or poison control center immediately.

### Information for doctor

**Most important symptoms and effects, both acute and delayed:** No further relevant information available.

**Indication of any immediate medical attention and special treatment needed:** No further relevant information available.

## Section 5 - Firefighting measures

**Flammability class:** May be combustible at high temperature.

### FLAMMABLE LIMITS

**LARGE FIRE:** Use water spray, fog or foam. Do not use water jet.

**Special hazards arising from the substance or mixture:** carbon oxides and other possible byproducts.

### Advice for firefighters

**Protective equipment:** Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head. During a fire, irritating gases may be generated by thermal decomposition or combustion. Fight fire from the maximum distance. Evacuate area.

## Section 6 - Accidental release measures

### Personal precautions, protective equipment and emergency procedures:
