

## LADDER BELT

Our ladder belt is designed for firefighting operations with an added a tether that extends the length of the connection out to 16-3/4 inches to reach the ladder rung. The wide padding and quick connect hardware make it comfortable and easy to don. Our lightweight auto-locking ProSeries XL Carabiner is included. Black web with red padding.

For proper fit, measure waist with turnouts on.

## Fire Ground Products

Our fire ground product line began with a fire department request for a ladder belt that had the comfort and quality of a CMC harness. To the traditional fall restraint and basic tool-carrying capability, we added comfort features and the strength required to meet NFPA standards.

CMC has continued to expand the product line for fire ground belts and harnesses by combining our design and engineering with ongoing input from firefighters. Our products can significantly increase the safety of firefighters by providing more and better options for fall restraint and emergency escape.
