

KASK SUPERPLASMA HD HELMET

An Evolution in Rescue and Rope Access Head Protection

ANSI Z89.1-2014 / CSA Z94.1-15

The Kask SuperPlasma HD helmets are specifically designed for professional rescue and work-at-height applications to provide the ultimate in head protection. They are lightweight, compact, comfortable, and well-ventilated with 10 air intakes. These intakes are equipped with protective aluminum anti-intrusion grills to deflect debris and water. Soft polyethylene side retractors regulate and secure strap length, with a special red-colored ring for fastening the helmet to a harness. Combines perfectly with the CMC Sunbrero!

- Headlamp clips are compatible with all headlights with elastic bands
- Four-point chinstrap is constructed from eco-leather that is anallergic and washable, and uses quick-release fasteners
- Antibacterial treatment prevents bacterial proliferation in padding
- Fast 3Dry fabric dries quickly and disperses moisture to the outside
- Front pad absorbs moisture for breathability and is easily removable for washing
- Innovative and exclusive UP & Down 2.0 technology ensures precise and comfortable fit around the back of the head. Center wheel and the two side wings allow quick adjustment in suspension width, height and tilt
- Attachment loop on chinstrap provided for clipping the helmet to a harness
- Integrated attachment system for the KASK accessories: Visor, face shield, earmuffs, other
