

The Double Clutch USB gives you the flexibility of shifting between beams and modes to fit your task, as well as choosing your battery source. It is also easy to use, even with gloves – just a quick twist of the facecap turns the light on and off, or changes the output from spot to flood.

Locking mechanism opens easily to access battery compartment for recharging/replacing batteries, but keeps the body from popping open if dropped

Adjustable elastic head strap

Facecap twists for easy functionality, even with gloves

Durable, impact-resistant polymer construction

Low-profile design with optimized center of gravity provides maximum comfort and stability during use
60° tilting head reduces neck fatigue

BEAM - Shift between spot and flood beams for distance or up-close lighting needs
BATTERY - Choose between USB rechargeable battery or alkaline back-up batteries
BRIGHTNESS - Shift between high and low modes for bright light or longer run time

Spot and flood beams - both with high and low modes
Twist facecap to power on and to change from spot to flood
Double twist to change from high to low beam - that's the "Double Clutch!"

Spot Beam to illuminate objects at a distance

- **High/Spot:** 125 lumens; 1,700 candela; 82m beam; runs 3.5 hours (lithium polymer); 6 hours (alkaline)
- **Low/Spot:** 30 lumens; 400 candela; 40m beam; runs 10 hours (lithium polymer); 18 hours (alkaline)

Flood Beam for work at arm's length

- **High/Flood:** 125 lumens; 250 candela; 31m beam; runs 3.5 hours (lithium polymer); 6 hours (alkaline)
- **Low/Flood:** 30 lumens; 70 candela; 4m beam; runs 10 hours (lithium polymer); 18 hours (alkaline)

Lithium polymer battery charges via USB connector; features charge status indicator

IPX4 water-resistant; 2m impact resistance tested

4 oz. (113g) [with lithium polymer battery]
