www.anchoruniform.com

A man in a white t-shirt and khaki pants is working at a long wooden table in a factory. He is leaning over the table, possibly measuring or cutting fabric. The background shows a large industrial space with high ceilings, fluorescent lights, and large windows. There are rolls of fabric and other equipment visible in the background.

ABOUT US

Anchor Uniform opened its doors in 2010, our foundation is built on the experience of over 40 years of manufacturing and product development.

With the ability to complete all aspects of manufacturing, we are also able to design and create our own patterns to accommodate any body type. Along with a full cutting room, our facility is equipped with fusing machines, a functional stitching floor and a finishing department. We pride ourselves in the quality of our goods which are inspected at every stage of production.

In addition to manufacturing, we are also a distributor working with reputable factories that provide high quality garments.

We rely on our partnerships with our dealers across the country to provide quality goods to end users. We strive to provide excellent customer service and look forward to working with you.

TECHNOLOGY

3M™ Scotchlite™ Reflective Material is recognized as the leading high performance retroreflective material for enhancing worker visibility. The Scotchlite reflective material brand provides increased peace-of-mind to people who wear safety garments. They know that their garment contains material that will enhance their visibility in low-light and night-time conditions and they value that their reflective material comes from 3M™, a trusted name known for quality and innovation.

Teflon™ fabric protector makes everyday easy. Teflon™ fabric protector provides the newest and most innovative generation of stain protection. It helps keep fabrics looking newer longer. Liquid spills bead up and roll off, and ground-in stains are released during cleaning.

Teflon™ is a trademark of The Chemours Company FC, LLC, used under license by Anchor Uniform.

For more than 20 years, Thinsulate™ Insulation has been the insulation of choice for consumers purchasing outerwear apparel. The original “warmth without bulk” insulation is still the warmest thin insulation on the market. Provides nearly one and one-half times the warmth of down or other high-loft insulating materials. Breathable, moisture-resistant and machine washable or dry-cleanable. Retains warmth even when damp.

Giving you the feel of cotton with the benefits of advanced fiber technology, SUPPLEX® performance fabrics is the registered trademark for the INVISTA brand of cotton-soft fibers and fabrics. SUPPLEX® fabrics are: Fully Breathable, Able to Hold their Shape, Faster Drying than Cotton, and Color Fast.
