SPRING/SUMMER 2022

**BATES**

# HONORED TO SERVE

Since 1885 Bates has been making high-quality footwear. Today we are the footwear leader for Military and Law Enforcement, and it's a title we've proudly held for 35+ years. We are tactical led and tactical first because we believe the brave men and women who risk their lives to protect us deserve gear that can back them up. Like the men and women who wear them, our boots are designed with duty grade performance to handle daily pressure and unplanned chaos. Our boots are also built for start-to-finish, 24/7 comfort because when the call comes in, it's time to move out.

DESIGNED FOR DUTY

# RALLY FORCE

## RALLYFORCE TALL ZIP DRYGUARD™ **NEW**

### TECHNOLOGY & FEATURES:

 Bates DRYGuard™ waterproofing membrane making sure you stay dry

- All terrain Michelin® proprietary rubber outsole
- TecTuff leather upper fights against abrasion
- Extremely breathable open cell mesh upper and tongue
- Quick on/off medial side zipper
- Lightweight, shock-absorbing IMEVA midsole
- Energy returning removable PU insert
- 11mm heel to toe drop for an athletic foot position
- Lightweight yet durable heat welded TPU reinforcements
- Outsole toe stitch for extra durability
- Non-metallic hardware and webbing
- Ankle lock lacing for a secure fit
- Athletic, sock-like fit strobil construction
- Durable 2-needle stitched upper

# BATES SOCKS

## TECHNOLOGY ICONS:

Proudly manufactured in the USA

**Moisture Control** - Keeping the moisture down and wicking it away allows the foot to stay cool and dry.

**Cushioned Soles** - The part of the sock that touches the bottom of the foot is completely knit with a secondary terry loop to create extra cushion and comfort on the inside of the sock without extra bulk.

**Reinforced Heel and Toe** - To strengthen the high pressure areas of the sock, the heel and toe are knit with durable yarn, to provide added durability and protection to the feet.

**Embedded Arch Support** - The area of the sock that corresponds with the arch of the foot is knit tighter, providing more support and comfort on the key pressure points of the feet. The added support of the embedded arch helps prevent foot fatigue.

**Breathable mesh** - Open knit stitching that forms a mesh panel on the top of the foot that helps increase circulation and breathability in the sock, allowing for optimum environment inside the sock. The open knit stitching also creates a textured appearance.

Proudly made right here in the USA, Bates socks are designed to keep your feet comfortable and dry during the day's toughest demands. Constructed with the finest materials available, Bates socks offer superior durability and protection to keep you comfortable all day.

The Bates brand's commitment to quality and innovations demand that every product we make be durable and strong as the tough individual wearing it. Its innovative construction and styling details provide long-lasting comfort.
