# HAND & ARM PROTECTION

### SOLID

Chemicals and liquids cannot penetrate a solid nitrile dip.

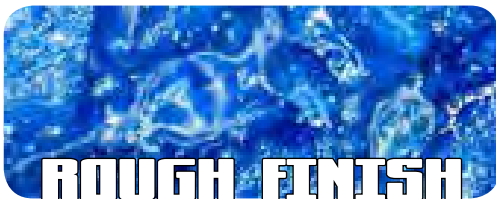

### MACH FINISH

The mach finish dip has a higher grip rating, better wear resistance and more protection than solid or foam dipped gloves.

### DOTTED

Dotted gloves provide an extra level of grip when compared to standard dipped gloves, ensuring a better user experience.

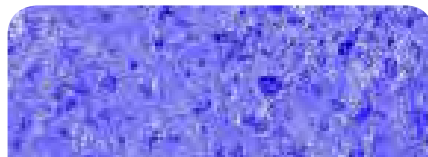

### ROUGH FINISH

Rough finish gloves have an added level of grip and better wear resistance than solid dipped gloves.

### ETCHED

The grip factor of etched gloves is not reduced by either wet or cold conditions.

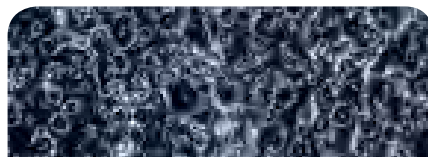

### AIR-INJECTED FOAM

While the wear resistance of air-injected foam may not be as high as other finish types, this foam type has enhanced dexterity and outstanding grip in wet/oily situations.

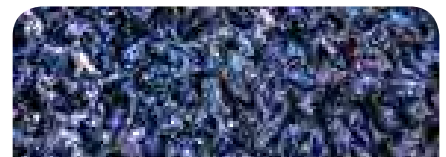

### NEW FOAM TECHNOLOGY

With a high degree of dexterity and grip in wet or oily conditions, New Foam Technology dipped gloves offer the user a comfortable, effective option.

### CHEMICAL FOAM

When compared to other foam dipped gloves, chemical foam has an increased level of wear resistance, good dexterity and a lower cost.

### XTREME FOAM TECHNOLOGY

A performance blended foam dip, Xtreme Foam Technology offers excellent dexterity and grip in wet or oily conditions.

## FINISH GUIDE

**It is important to properly measure your hand so that gloves fit correctly.**  
The proper size will provide the best protection and performance.

### **Measuring Directions**

- **Wrap a soft cloth measuring tape entirely around your dominant hand, just below the knuckles.** For reference, your dominant hand would be your right if you are right-handed and left if you are left-handed.
- **If you don't have a soft cloth measuring tape you can wrap a piece of string around your hand and measure the length of the string using a ruler.**
- **Take the full circumference measurement and compare it to the chart for the recommended glove size\*.**

<b>NUMERIC SIZE</b>	<b>LETTER SIZE</b>	<b>INCHES**</b>
5	XXS	5
6	XS	6
7	S	7
8	M	8
9	L	9
10	XL	10
11	2XL	11

This example shows a circumference measurement of 9 inches. The recommended glove size for this user would be Large (9).

\* Estimate size to the closest fit  
\*\* Hand proportions may vary

## **GLOVE MEASURING GUIDE**

# CHOOSING THE RIGHT DIP POLYMER

## NITRILE

Nitrile is a synthetic polymer that is unusually resistant to chemicals, oils and fuels. Due to the superior strength of nitrile, gloves dipped with this polymer also have a higher abrasion resistance compared to other polymers.

## POLYURETHANE

Polyurethane dipped gloves offer a high level of dexterity to the user. The dip also adheres through the entire glove liner, which prevents flakiness and peeling gloves.

## RUBBER

Rubber dipped gloves have an inherently strong grip ability and are the most elastic polymer. They perform well under extreme temperatures and do not tear easily. Rubber dipped gloves are not recommended for use with petroleum-based organic solvents.

## NEOPRENE

Neoprene was invented to replace natural rubber in chemical handling situations. It is not susceptible to most hazardous chemicals and can be used safely. It also holds up well to UV light.

## PVC

PVC is a low cost, liquid resistant polymer that performs well in petro-chemical situations because of good abrasion resistance and flexibility at low temperatures.

# Wise C.I.A. Gripster®

WISE GRIPSTER CUT, IMPACT AND ABRASION GLOVES ARE SIGNIFICANTLY MORE COMFORTABLE WHEN COMPARED TO OTHER OIL, GAS & CONSTRUCTION GLOVES.

THE MACH FINISH NITRILE DIP ENHANCES GRIP WEAR AND INCREASES THE LIFE OF THE GLOVE.

# CHOOSING A CUT RESISTANT FIBER

## TUFFALENE®

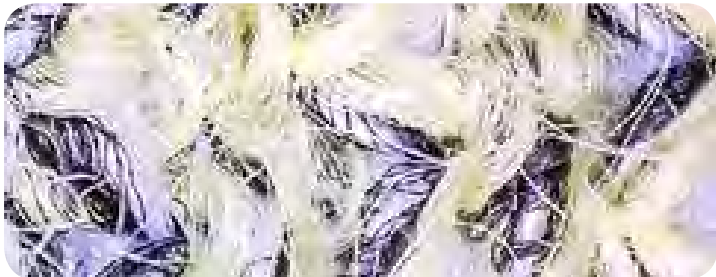

- ABRASION RESISTANCE
- WASHABLE
- OFTEN ENHANCED WITH FIBERGLASS OR STEEL
- MONOFILAMENT
- HIGHLY DEXTEROUS
- LINT-FREE
- NOT RECOMMENDED FOR HEAT APPLICATIONS

## TUFFKUT®

- ABRASION RESISTANCE
- HEAT RESISTANCE
- LINT-FREE
- WASHABLE & ECONOMIC

## ARALENE®

- ENHANCED WITH FIBERGLASS OR STEEL
- ABRASION RESISTANCE
- HIGH HEAT RESISTANT
- SENSITIVE TO UV LIGHT
- NOT BLEACHABLE

## KEVLAR®

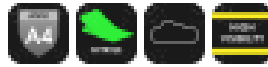

- NONCONDUCTIVE
- HIGH HEAT RESISTANT
- WASHABLE/DRY CLEAN
- SENSITIVE TO UV LIGHT
- MAY SHRINK AFTER WASH
- NOT BLEACHABLE

MADE IN  
USA

# Tuffalene®

FEATURING ALPHASAN® ANTIMICROBIAL PROTECTION THAT LASTS,  
TUFFALENE SLEEVES ARE LOOSE-FITTING AND COMFORTABLE  
WITH AN IMPRESSIVE ANSI A6 CUT LEVEL RATING.  
THEY ARE FDA COMPLIANT WITH 21 CFR 170-199 FOR FOOD CONTACT.

CR336G-21C

CR336-S10

CR336G-21C	TUFFALENE HDPE	21 INCHES	ELASTIC	CUT A6
CR336G-S10	TUFFALENE HDPE	10 INCHES	ELASTIC	CUT A6

## WASHING KEVLAR SLEEVES

1. Use commercial laundry soap/detergent
2. DO NOT BLEACH - oxygen bleach may be used as a replacement
3. Use 170°F/75°C water to wash for 20 minutes
4. Rinse - 1 time in hot water, 1 time in cold water
5. Tumble dry for up to 35 minutes at 155°F/70°C

Kevlar can also be effectively dry-cleaned.

**K24SLT**

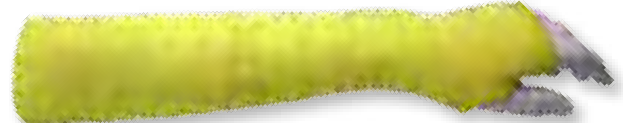

**KEVLAR®**

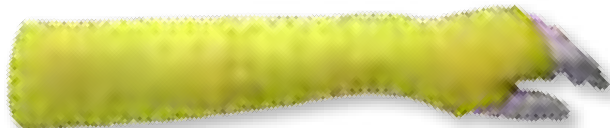

THESE SLEEVES ARE MADE IN THE USA WITH KEVLAR BRAND ARAMID.

# CHOOSING THE RIGHT HEARING PROTECTION IS CRITICAL

Permanent hearing loss can result from extended exposure to unsafe levels of sound. This type of hearing loss is irreversible and cannot be corrected with hearing aids or other equipment. In addition to temporary or permanent hearing loss, loud noises can also create physical and psychological stress and interfere with productivity and communication.

To protect from these types of hearing risks, adequate hearing protection should be used.
