Cutting-Edge Turnout Gear Technology

LION has a long legacy of introducing ground-breaking PPE innovations work to best prepare firefighters for the dangers they face each day, keeping them safe and ready for action – before, during and after.

A - V-Fit® Design

V-Force® Turnout gear features V-Fit® design which is based on the contoured, stress-reducing, action focused garments worn in combat and sports. This dynamic cut-in-motion design results in a more body-friendly fit that increases mobility and comfort, without sacrificing safety.

B - Ventilated Trim™

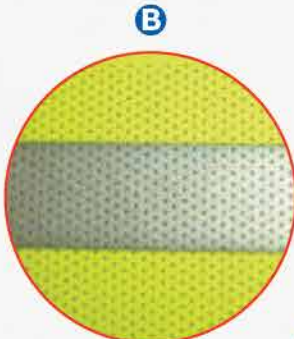

Ventilated Trim™ made with 3M™ Scotchlite™ Reflective Material helps firefighters reduce compression burns. Perforations provide a conduit for vapor release and guards against the potential hazards of trapped moisture, without adding weight to the garment.

C - Lite-N-Dri™

Lite-N-Dri™ cushioning provides supplemental thermal insulation to LION turnout coats and pants in high-compression areas such as knees, shoulders, elbows, and yoke. It deflects and absorbs energy through millions of air pockets that make it much denser than conventional reinforcement materials. Lite-N-Dri is also impermeable so it will not absorb water. This further helps reduce your vulnerability to compression-related burn injuries. That's why Lite-N-Dri is built into the knee of every model of LION turnout gear.

D - Semper Dri™

SemperDri™ employs 99% of a special durable water-repellent finish thermal lining material at the lower half of the legs and arms to reduce absorption so they stay drier and lighter. Less weight means more comfort and less stress on you and your gear. In comparative field tests, garments using the SemperDri System were noticeably lighter in weight after structural firefighting activities and training exercises involving high volumes of water. SemperDri material is also standard in the water wells of coat sleeves and in the shoulder/yoke area of coat liners.

ISODRI® MOISTURE MANAGEMENT SYSTEM

NAFECO

KEEPING YOUR TURNOUTS DRIER, FASTER.

Outer shell is treated with durable water repellency intake from outside sources such as hose water and rain.

Moisture barrier that allows body heat, in the form of vapor, to escape, but keeps liquid out.

Thermal insulation is treated with durable water repellent to shed moisture generated by the body and maintain high thermal performance. AraFlo® promotes air permeability to allow vapor to be released by the body and more easily transported away from the skin.

Face cloth wicks perspiration away from the body.

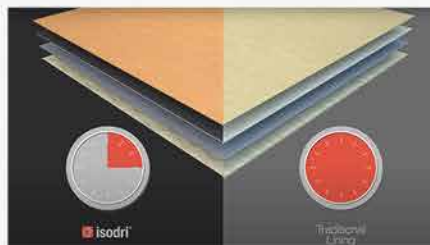

Firefighters wearing gear with IsoDri have reported that their gear is dry and comfortable in less than 30 minutes.

LIGHTER

LION engineered IsoDri to reduce water intake, helping your turnout gear stay lighter and less vulnerable to heat. Optimum moisture management comes from a thermal liner that both wicks and sheds water.

IsoDri® features a facecloth that wicks perspiration which disperses the moisture for faster drying. The layer(s) of DuPont™ Nomex® E-89™ treated with a durable water repellency refuse to draw in the moisture and resist absorption, allowing the thermal barrier to function as designed. DuPont Nomex E-89

DRIES FASTER

based thermal liners are made from lightweight and durable nonwoven fabrics and fibers available only from DuPont™. In addition, IsoDri® thermal liners using apertured AraFlo® promote higher air permeability than other systems and complement state-of-the-art moisture barriers such as GORE CROSSTECH® or Stedair® Moisture Barriers.

So, if your turnout gear doesn't have all five of these components, it isn't an IsoDri Moisture Management System:

COOLER

1. Outershell that helps block liquid from external sources
2. Thermal liner insulation that reduces moisture regain from sweat and other water sources
3. High-lubricity face cloth that wicks perspiration away from the body
4. Semper Dri® face cloth thermal insulation in sleeves, lower legs and shoulder/yoke to reduce absorption
5. Wristlets treated with a durable water repellency to repel moisture from outside sources

CONTAMINANT CONTROL PACKAGE

Closure Guard

YOU'RE NOW ENTERING THE

REDZONE™

Contaminant Control Package

Particulate-Blocking Hood

When you arrive on the scene of a fire, your personal protective equipment (PPE) is immediately exposed to a number of toxic chemicals – exposure that can result in serious health problems. That includes cancer, which is currently the leading cause of U.S. firefighter deaths. With that fact in mind, LION has developed RedZone™, our exclusive, NFPA 1971-certified contaminant control package.

Developed in partnership with the U.S. Department of Homeland Security (DHS) and North Carolina State University's Textile Protection and Comfort Center, RedZone, the only gear tested, proven and verified by UL to block particulates features particulate-blocking zones designed to help reduce your exposure to the dangers lurking in fireground smoke.

CONTAMINANT CONTROL PACKAGE

ZONE 1:

Particulate-blocking Hood

A breathable, ultra-soft hood with StedAir® PREVENT protects the head and neck from particulates, while also providing excellent mobility and unrestricted hearing during firefighting activities.

ZONE 2:

Arm Guard

Elasticized wrist shields and enhanced IsoDri® knit wristlets with Nomex® Nano Flex help block particulates at the coat-to-glove interface.

ZONE 3:

Core Guard

A Nomex® Nano multi-layered composite with an elasticized band helps reduce particulate ingress at the coat-to-pant interface.

ZONE 4:

Closure Guard

Engages with just one zip. No extra steps to don the gear. Red hook and loop indicates when turnout coat is properly closed.

ZONE 5:

Leg Guard

Together, the elasticized ankle shield and Nomex® Nano Flex calf protector help block particulate exposure at the pant-to-boot interface.

No ingress at turnout coat, pant, glove, boot interfaces and closures.

FREQUENTLY-ASKED REDZONE QUESTIONS	YES	NO
Is RedZone turnout gear verified by UL?	●	
Does it increase body temperature and heat stress over conventional turnout gear?		●
Are the cleaning and care procedures the same as conventional turnout gear?	●	
Does it require a different donning procedure?		●
Does it restrict range of motion during firefighting?		●
Is it available in male and female gear models?	●	
Can be retrofitted to existing V-Force® garments?	●	

Now available in Super Deluxe

FIRE & RESCUE GLOVES

GORE®
CROSSTECH®
MOISTURE BARRIER

PACKAGE INCLUDES

A - Shelby® FDP™

Fire retardant, heat resistant, 3.25 to 4.0 oz. Brushed pigskin & gold Koala tanned cowhide. * # 5226 (Gauntlet)

B - Shelby® Koala Tanned Cowhide

Fire retardant, heat resistant, 3.25 to 4.0 oz. midnight blue Koala® tanned cowhide. * # 5228 (Gauntlet)

C - Shelby® FDP™ Big Bull

Grain bull elk, abrasion resistant, brushed pig palm, heavy weight fire retardant. * # 5280G (Gauntlet)

D - Shelby® FDP™ Big Bull

Grain bull elk back and palm, heavy weight fire retardant, grain elk hide. * # 5282G (Gauntlet)

E - Shelby® FLEX 24-7

Simplex® Kevlar, Hi-Tech Kevlar/Nomex Knit, Crosstech® film technology, NFPA compliant. # 2585 (Gauntlet)

F - Shelby® Xtrication® Rescue

Kevlar reinforced palm & finger reinforcements are at all the high wear stress points. Hipora waterproof barrier and soft breathable Bemberg Lining. # 2511

G - Shelby® Xtrication® Rescue

Kevlar reinforced palm & fingers, injection molded TPR padding covering back of hand. # 2500

H - LION Commander ACE

Gore Crosstech Insert for lightweight, breathable liquid penetration protection. NFPA 1971. XXS to 4X-Large # LPG928BK

I - LION Primus

Gore Crosstech® Insert & Kovenex lining offer lightweight, flexible, & comfortable liquid & thermal protection. NFPA compliant, XXS to 4X-Large (cadets available) # LPG955

J - LION Mechflex Xtreme Extrication

Dexterity for extreme conditions including accident & tactical rescues. S to 2XL #LPGMXXT

K - FireCraft® The Phoenix

No bunching of material in the palm. Porelle FR® moisture barrier. XXS to 3XL # FC-P5000

L - FireCraft® Extrication/Work Glove

Two continuous layers of cut protection. Moisture barrier is durable, Non-slip grip. S to 2X-Large #FX-54MB

M - FireCraft® Extrication Barrier

Porelle® Liquid Penetration Protection with the Spectra® Level-4 Cut Resistance. S to 2X-Large # FX-95MB

TURNOUT BAGS, CLEANER & TOTALCARE

NAFECO

 **TotalCare**[®]

A

Turnouts and other PPE represent a major investment for your department. With dwindling budget dollars, you want maximum return out of your investment, while maintaining optimum levels of safety. LION TotalCare, a leader in PPE maintenance and repair, can help save you money and keep your gear safer, longer. Part of our Contaminant Control Network of products and services, TotalCare is a NFPA 1851-verified ISP recognized by all PPE manufacturers. TotalCare provides professional maintenance services that help enhance firefighter safety, extend the life of your PPE and save you money.

A - TotalCare services include:

- Advanced Inspection
- Advanced Cleaning
- Decontamination & Disinfection
- Repairs
- Retrofits & Alterations
- Rental Gear
- Emergency Back-Up Gear
- NFPA 1851 Record keeping
