Our products are designed with the officer in mind

Prisoner Transport Partitions

Pro-gard's Prisoner Transport Systems are designed around the placement of the partition. We realize that many officers can spend upwards of eight hours per day in their cruiser. It is our goal to mount our partitions with minimal impact to the OEM operation of the driver's seat.*

As a result, the driver can enjoy the same seat travel and adequate recline that is built into the vehicle's OEM design.

Three Configurations

Along with the straight style of the Standard Partition, we offer the popular Space Saver style partition that creates space for a Gun Rack behind the console.

Our Space Saver Plus Partitions are available for the PPVs that require additional space in the prisoner compartment.

Optional Gun Rack Mounts

Officers can keep their weapons close at hand with our various Gun Rack options (more information can be found on pages 21/24).

Cargo Barriers

These dividers provide an essential barrier between the cargo area and the passenger area of the cruiser. We mount the barrier to maximize space for both the prisoner compartment and officer storage.

Prisoner Transport Lighting

Illuminating the prisoner compartment is important for maintaining visual contact with the transport. Our surface mounted LED lights give the officer both high and low light options with minimal drain on the battery.

Rear Window Armor & ABS Door Panels

Rear Window Armor prevents the prisoner from kicking out windows.

Our ABS Door Panels further secure the prisoner by eliminating interior access to window controls, door latches, and door locks.

Prisoner Transport Seats & Floor Pans

Besides their easy clean feature, our seats are designed to fit further back and lower than OEM seats. This positions the prisoner further away from the partition giving the officer better control while loading and unloading.

Adding our Floor Pans helps to void the prisoner compartment of gaps and crevices where contraband could otherwise be discarded.

Products that fit together seamlessly to maximize space and enhance the officer's efforts

Pro-cell Prisoner Containment Systems

Available in three configurations, these systems combine all the benefits of our Prisoner Transport System while confining the transport to a smaller section of the back seat.

Outboard Seat Belts

Restraining unruly prisoners can be challenging at best. Eliminating the officer's need to reach across the prisoner to secure the seat belt is a much better option for officer safety.

*Some variation in the Tahoe Space Saver Plus Partition design occurs with minimal impact to seat travel/recline

Prisoner Transport Partitions

Safety has always been Pro-gard's first concern when developing products for your agency. When it comes to prisoner transport, we realize there are two key factors to consider, officer safety and prisoner safety during the transport. Times have changed and so have vehicles, cabin space has become more condensed which, means less leg room for both prisoner and officer.

All of our Prisoner Transport Partitions are designed to give your officers peace of mind about prisoner confinement without compromising their comfort.

Space Saver Plus

- Driver seat maintains full travel and adequate recline*
- More clearance for loading and unloading prisoners and increased legroom during transport
- Same familiar mounting style of our Universal Partitions
- Nine different window configurations
- Sturdy, 14 gauge steel construction provides ample resistance against even the most aggressive transports
- Comes with Recessed Panel and SSP Bucket Seat Protectors
- Currently offered in Chevrolet Tahoe, Dodge Charger, and Ford PI Sedan

Shown in a Dodge Charger

Space Saver Option

- Driver seat maintains full travel and adequate recline
- Optional Bucket Seat and Recessed Panel eliminate places to stash contraband
- Universal designs help reduce long-term replacement costs**
- Optional Recessed Panels for mounting Vertical Gun Racks
- Nine different window configurations
- Coated foam padding conforms to and protects the headliner against rubbing
- Sturdy, 14 gauge steel construction provides ample resistance against even the most aggressive transports

Shown in a Chevrolet Caprice

Standard Option

- Driver seat maintains full travel and adequate recline
- Optional Full Width Extension Panels protect seat backs and eliminate places to stash contraband
- Universal designs help reduce long-term replacement costs**
- Optional Horizontal Mount Gun Racks available
- Nine different window configurations
- Coated foam padding conforms to and protects the headliner against rubbing
- Sturdy, 14 gauge steel construction provides ample resistance against even the most aggressive transports

Shown in a Ford PI Utility

**Contact a Pro-gard customer service representative for vehicle transfer compatibility
*Some variation in the Tahoe Space Saver Plus Design occurs with minimal impact to driver seat travel and recline

Airbag Wing Filler Panels

Patented Airbag flexible wings yield against the force of a side curtain airbag yet, provide resistance in limiting access to the front passenger area

Rigid wings available, must be used with AOI Airbag On/off Control Switches in vehicles with side curtain airbags (see page 12 for more information)

Patented Designs

Universal Fitment

Our Universal Partitions* can be moved from one PPV to another at the end of service with the addition of a Vehicle Specific Transfer Kit.*

The open interior of SUVs can create potential hazards for officers carrying loose equipment. Pro-gard's rugged, steel Cargo Barriers offer a safe means to secure the cargo area of your SUV from the passenger compartment.

- Mounts utilizing pre-existing OEM holes for an easier installation
- Protects from loose equipment that might otherwise slide forward from the rear of the vehicle

Wire Screen Window shown in a Ford PI Utility

- Mounts outside of the side curtain airbag deployment zones
- Perfect mounting platform for electronics equipment

Wire Screen Window

Polycarbonate Window

Partition Window Options

- Choose from nine designs
- Ergonomic latches
- Easy to clean

00 Passenger 1/2 Sliding Polycarbonate Window

02 Stationary Polycarbonate Window

04 Center Sliding Polycarbonate Window

05 Full Wire Window

12 1/2 Polycarbonate 1/2 Expanded Metal Window

13 Vented Stationary Polycarbonate Window

14 Polycarbonate Center Sliding Window w/ Metal Insert

16 Stationary Polycarbonate Window & Center Metal Insert

17 1/2 Slider Polycarbonate Window w/ Expanded Metal

Cargo Barriers

Prisoner Transport Seats & Floor Pans

With the transport areas shrinking in Police Package Vehicles, Pro-gard's Prisoner Transport Seats significantly increase space for passengers in the rear seating area over OEM seats and other seats in the market. Molded from sturdy ABS plastic, our seats and floor pans fit the curves and contours of vehicles to eliminate potential gaps and crevices where contraband might otherwise be hidden.

- Molded from one continuous piece of ABS for added durability
- Rugged design resist the daily abuse of transporting prisoners
- Increased foot well room for better control when placing prisoners
- Simple, routine cleaning maintains pathogen control

- Seat belt pucks/grommets enclose gaps around the factory seat belt
- SUV seats are sold with/require a Cargo Barrier (see page 6 for more details about Cargo Barriers)
- Optional installed drain hole grommets provide a watertight seal between the pan and undercarriage that allow for easy drainage during cleaning

- Seats are designed to work seamlessly with our Floor Pans to provide
- Eliminates gaps and spaces where contraband might otherwise be discarded

SUV Seats must use Pro-gard Cargo Barriers for Mounting

Shown in a Ford PI Utility

Shown in a Chevrolet Caprice

Rear Window Armor & ABS Door Panels

Pro-gard's Window Armor is designed to withstand the force of a prison trying to kick their way out of the vehicle. Our Rear Door Panels further eliminate the prisoner's ability to escape confinement by removing access to window controls and door locks/latches from interior of the vehicle.

- Stop the costly cycle of replacing rear-side windows due to prisoner destruction
- Quick and easy to install
- ABS Rear Door Panels eliminate access to door latches, locks, and window controls from the interior
- Our ABS Rear Door Panels eliminate potential leverage points that are present with OEM style panels and covers
- Will not interfere with side curtain airbag deployment

Steel Bar Window Armor

- Rugged Steel Bars provide maximum protection
- Black powder coated steel resist moisture

OEM Door Panel

ABS Door Panel

Shown on a Ford PI Sedan

Polycarbonate Window Armor

- Polycarbonate Window Armor maintains a less aggressive look
- Reinforced steel frames strengthen and secure the design

ABS Door Panel

Outboard Seat Belts

Shown in a Chevrolet Tahoe

Locating the seat belt buckles on the outer edge of the seat greatly lessens unpleasant and unsafe situations for officer by removing the need to reach across prisoner to restrain them.

- Two female buckles: prep position is out of the way on partition for easy of loading/unloading, lock position is at lap level for securing the prisoner for transport
- Reduces contact with prisoner for biohazard protection
- Officers no longer have to reach across the prisoner to securely buckle them into the vehicle
- Retrofit kits available
- Bright blue for visibility
- Easy to adjust

Prisoner Transport LED Lighting

Illuminating the prisoner transport area is simple with our low-profile, LEDs. Switch between brilliant white light for harsh contrast lighting or ambient red lighting that is less irritating to eyes accustom to darkness.

- Lightweight, low-profile design, no cut-outs required
- Descends less than 1/2" from surface when mounted
- Ideal for prisoner transport and cargo areas
- Flange mount included
- Two-way lights, sold in pairs

High contrast white light feature shown in a Ford PI Utility

Ambient red light feature shown in a Ford PI Utility

Pro-cell Prisoner Containment Systems

Expanding on the cohesive design of our Prisoner Transport Systems, Pro-gard's Pro-cell Prisoner Containment Systems combines all the great space creating and safety features of our other products. The addition of our clear polycarbonate divider, the transport is now confined to a single side of the compartment, minimizing motion and activity.

- All the benefits of our Prisoner Transport System with the addition of a clear, polycarbonate divider the splits the back seat in half
- Divider mounts to and matches contours of Seat and Floor Pan to eliminate potential areas to stash contraband
- Easy to clean ABS plastic, polycarbonate, and powder coated steel products
- Optional Outboard Seat Belts that eliminate officer's need to reach across prisoner while restraining
- Products fit snug against one another eliminating gaps and crevices to minimize prisoners discarding contraband
- Confines prisoner to half of the rear seat with no access to door latches, locks, or window controls

Each system comes complete with:
 (1) Prisoner Transport Partition,
 (1) Set of Extension Panels/Seat Protectors,
 (1) Prisoner Transport Seat**, (1) Floor Pan*,
 (1) Clear, Polycarbonate Seat Divider,
 (1) Pair, Window Armor, (1) Pair, Rear Door Panels
 optional: (1) Pair, Outboard Seat Belts

Transport Prisoners in total confinement

Choose from three designs

P1000 Single Prisoner

1/2 Cage Design

- Full safety benefits of Prisoner Transport Partition, does not compromise driver's range of space, maintains full seat travel and recline
- Half Cage design stops midway over the transmission hump leaving the entire rear seat area open behind the driver's seat
- Mount single or dual weapons with a Pro-cell Half Cage Weapon Mount (see left)
- Clear, Polycarbonate Divider compartmentalizes the prisoner area and opens up additional storage space behind the driver's seat
- Design is optimal for the tallest officer's in the agency with zero impact to OEM seat positioning
- Facilitates the option for a safe, third "friendly" passenger

Shown in a Dodge Charger

P1500 Single Prisoner

1/2 Cage, Full Roll Bar Design*

- Full safety benefits of Prisoner Transport Partition, minimal impact on driver's range of space, maintains full seat travel and adequate recline
- Half Cage design stops midway over the transmission hump with additional roll bar support added behind the driver's seat
- Mount single or dual weapons with a Pro-cell Half Cage Weapon Mount (see left)
- Clear, Polycarbonate Divider compartmentalizes the prisoner area and opens up additional storage space behind the driver's seat
- Facilitates the option for a safe, third "friendly" passenger
- Benefit from full roll bar protection
- Not available for SUVs

Shown in a Dodge Charger

P1826 Dual Prisoner

Full Cage Design

- Full safety benefits of Prisoner Transport Partition, minimal impact on driver's range of space, maintains full seat travel and adequate recline
- Clear, Polycarbonate Divider divides the prisoner area into two compartments for transport
- Eliminate the need for a second transport vehicle when transporting two prisoners
- Mount single weapons with a Horizontal Partition Mount or single/dual weapons with a Vertical Partition Recessed Mount (see left)
- Ideal for male/female, adult/juvenile, domestic disputes, and other transports of two people
- Center placed window allows ventilation to both sides of the back seat

Shown in a Dodge Charger

Gun Racks are available for all Pro-cell Systems

Front Passenger On/off Control Switches

Patented Design

The sheer force of an airbag deployment is extremely powerful. So much so, it can cause objects in its deployment path to become dangerous projectiles.

- Use to deactivate airbags when radar, cameras, LPR systems, and other aftermarket equipment is mounted in the airbag deployment zone (dash)
- OEM Plug-and-Play adaptors for police package vehicles make for quick and easy installation
- Small profile box fits easily under the dash or other confined spaces
- Optional remote status lights are available when the switch is mounted in glove boxes, under the dash, or other “invisible” locations
- Key operated switches can be turned off to protect equipment or on to protect passengers as needed (airbags should remain turned off anytime equipment is mounted in the airbag deployment zone)
- Highly visible, LED telltale light clearly indicates if airbag protection is turned off
- Each switch is tested to 100,000 cycles
- Pro-gard’s AOI Airbag On/off Control Switches meets NHTSA regulations
- NHTSA will allow vehicles used in emergency situations to install airbag on/off switches
- Many municipal insurance plans already compensate for airbag on/off controls

Pro-gard’s patented, Airbag On/off Control Switches provide officers the security they need to do their job without the fear of conflicts between the airbag and aftermarket equipment mounted in the front dash area.

Optional Remote Status Light

Eliminate Conflicts with Aftermarket Equipment

Aftermarket electronics have become a mainstay for officers to perform their regular duties. With multiple devices and limited dash space, equipment is often mounted in the passenger airbag’s deployment zone. But what happens to this equipment if an airbag deploys? It can and usually does become dangerous projectiles. Installing a front passenger AOI Airbag On/off Control Switch can eliminate this potential hazard, not only protecting your officers but also, expensive equipment and possible bystanders.

click on listings to jump to product listing on pro-gard.com

Side Curtain On/off Control Switches

Patented Design

- Highly visible, LED telltale light clearly indicates if airbag protection is turned off
- Each switch is tested to 100,000 cycles
- NHTSA does not currently require side curtain airbags remain active
- Many municipal insurance plans already compensate for airbag on/off controls
- Small profile box fits easily under the dash or other confined spaces
- Key operated switches can be turned off to protect equipment or on to protect passengers as needed (airbags should remain turned off anytime equipment is mounted in the airbag deployment zone)
- OEM Plug-and-Play adaptors for police package vehicles make for quick and easy installation

Our patented Side Curtain Airbag On/off Control Switches offer fleets the ability to continue utilizing rigid wing partition filler panels and roof mount gun racks without fear of conflicts in an airbag deployment.

Roof Mounted Gun Racks

Eliminate Conflicts with ANY Roof Mounted Gun Rack

Side curtain airbags may deploy from the area where roof mounted gun racks connect to the vehicle’s headliner. In such cases, if an airbag deployment occur, the consequences could be catastrophic if a weapon or part of the gun rack is transformed into a projectile object. This gun mounting style can be safely utilized when an AOI Airbag On/off Switch is used to shut off the side curtain airbags. (See page 26 for more information about our Pro-clamp, Roof Mount Gun Rack.)

Rigid Wing Filler Panels

Eliminate Conflicts with ANY Rigid Wing Partition

Rigid wing partition panels are not designed to give easily under the force of an airbag deployment. It is possible that they can snap loose (or into many pieces) and become projectile objects in the event of an airbag deployment. By shutting off the side curtain airbags agencies, who prefer this partition design, can still use their preferred equipment style without fear of an airbag deployment. (See pages 5-6 for more information about our Prisoner Transport Partitions.)

VEHICLE ANTI-THEFT SYSTEMS

Vehicle thefts are on the rise and police fleets are not spared from this concern. Just read the headlines and you'll soon notice that stolen police cruisers happen on quite a regular basis. As part of their jobs, officers must often leave running vehicles unattended, for short durations. This can make the cruiser an easy target for theft, especially enticing to criminals who see no other means of escape from their situation.

The automatic and natural motion of removing the ignition key will activate the vehicle theft protection, no buttons to push. Safestop's minimal amp draw means fleet managers do not have to worry about unnecessary power consumption. Because of our 24/7 Always-on Protection, vehicles are protected around the clock, even when parked in a deserted pool lot or a dark driveway overnight.

Pro-gard's Safestop provide fleets with vehicle theft protection without requiring officers to remember additional steps for activating the system other than removing the ignition key

Patented Design

THE KEY IS THE KEY TO PREVENT CRUISER THEFT

- Once the system is activated, the anti-theft functions allow the vehicle to remain running even after the ignition key is removed; with the ignition key removed the shifter is locked and the anti-theft functions cannot be overridden, even if the toggle switch is turned off
- Unit integrates with the ignition system and offers additional connections for securing both gun racks and trunk contents
- 8 second Gun Lock Delay allows ample time for officers to access weapons in electronic gun racks upon removal of the ignition key
- Plug-and-Play adaptors easily integrate into the vehicle ignition system for quick and simple installations
- Extremely low amp draw means that the system can remain activated 24/7 without worries of battery drain
- Low profile housing fits neatly and discretely out of sight, underneath dash

click on listings to jump to product listing on pro-gard.com

STEP 1

Turns the system on via the toggle switch

Due to its extremely low amp draw, the switch can be left on indefinitely so officers don't have to remember to turn the system on whenever they exit the vehicle

STEP 2

Activates the anti-theft functions anytime that the ignition key is removed, while the system is turned on

Anti-theft functions can be configured to protect against theft of the cruiser, gun racks, and trunk contents

The Safestop Anti-theft System is activated through a toggle switch that can literally be turned on once and left on for as long as the anti-theft system is installed in the vehicle, there is no need to ever shut it off

Once the Safestop Vehicle Anti-theft System is activated (toggle on), anytime that the key is removed from the ignition, the vehicle (as well as, gun locks and trunk contents) will be protected against theft

With Safestop, the vehicle remains running, maintaining functionality of all electronic functions including: Air-conditioning and heat; Surveillance Equipment (cameras, radar, etc); Radios; Lights and Sirens; Computers and more

Cannot be put into gear and driven off

This feature will protect your weapons mounted in an electronic gun rack against theft anytime the Safestop Anti-theft System is activated, even when the momentary switch is pressed (see pages 21-26 for more information about our Gun Racks)

This feature will protect the contents of the trunk from being accessed via the factory trunk latch release as long as the Safestop Anti-theft System is activated

Brake Pedal Override feature kills the engine instantly for use with the 24/7 Always-on protection feature

Universal Push Bumpers & Universal LED Push Bumpers

We've designed our push bumpers with wear and tear in mind. Our Push Bumper features a rugged steel design that allows you to softly push stranded vehicles to safety without fear of compromising the bumper or vehicle's structure.

- "No Holes Drilled" installation, uses existing OEM holes and slots to mount bumper for a quick and easy installation
- Improved solid weld, rugged steel construction ensures a longer, more durable life for the bumper
- Integrated mounting design will not interfere with the SRS airbag system
- Features pre-cut holes and slots for mounting popular auxiliary lighting and speakers
- Black powder coated finish prevents corrosion from salt spray and other environmental conditions

Patented Design

Three LED Patterns:
All Red, All Blue, or 1/2 Red/ 1/2 Blue

click on listings to jump to product listing on pro-gard.com

XPush Bumpers

Studies have shown that prompt removal of disabled vehicles from traffic patterns can greatly reduce chances of additional accidents occurring. The addition of a Pro-gard Push Bumper allows for safe and easy removal of such vehicles.

Shown on a Ford PI Utility

- Designed extra large to provide full coverage of the front grill and headlight area against animal strikes and debris
- Provides an added layer of protection to vital engine and cooling components from obstacles in vehicle's path
- Made from durable, heavy-duty aluminum
- Solid state construction prevents the bumper from twisting or flexing into the vehicle that can cause scuffs and scratches to vehicle
- Mounting system keeps bumper in balance even when performing PIT maneuvers
- Mount will not compromise the vehicles structure or frame
- Black powder coated finish resists salt spray and other environmental conditions that can otherwise cause corrosion

Sedan Options

SUV Options

Shown on a Chevrolet Tahoe

Shown on a Ford PI Utility

The open visibility of an SUV's cargo area can quickly become a problem. The wrap around windows of the cargo area make expensive duty gear and weapons more visible over a sedan's trunk.

This can create a very enticing scenario for the would be thief. Pro-gard's Rear Window Guards are the perfect theft deterrent in this situation.

- Prevents break-ins and theft of highly visible cargo area contents like weapons and expensive duty gear
- Durable 1/8" wire screen with 2" spacing, will not hinder the driver's rear window visibility
- Installs underneath the window trim for a clean smooth finish, will not snag on clothing or duty gear
- Contoured tabs fit snug against window edges for a clean smooth finish
- Includes: Rear Cargo Door Window Guard, pair of Rear Side Window Guards, Polycarbonate Space Fillers, mounting hardware and instructions
- Sturdy but lightweight construction will not wear out the actuators of the rear hatch

Rear Window Guards

Shown in a Chevrolet Tahoe

Ballistic Door Panels

These days, many officers are finding themselves needing extra protection against weapon fire. Give your officers added protection on their most dangerous beats with our NIJ Level IIIA rated Ballistic Door Panels.

- Kevlar® panels are significantly lighter than panels made from other materials
- Offer more coverage than factory options
- Tested to NIJ Level Testing Standards/humidity and temperatures
- Discrete, undetectable look that is easy to install
- Steel, NIJ Level III Panels are available for select models*
- Will not interfere with window operation
- NIJ Level IIIA protection against bullets up to a 44 Magnum as well as all threats in Types I, IIA, and II.

- Added layer of protection for vital components (transmission, exhaust manifold, and oil pan) that are otherwise exposed
- Rugged steel construction stands up against the daily wear and tear of off road driving and median/shoulder traffic stops
- Quick and easy access for routine maintenance like oil changes without removing the skid plate
- "No Holes Drilled", uses existing factory holes and slots for a quick and easy installation
- Black powder coated finish resists corrosion from salt spray and other environmental conditions

Actual damage to a PI Utility without a Pro-gard Skid Plate

Coverage of a Pro-gard Skid Plate shown on a Ford PI Utility

Coverage of the OEM Skid Plate shown on a Ford PI Utility

Skid Plates

The common maneuvers of pulling off the road for routine traffic stops or cutting through medians can take a serious toll on the undercarriage of police vehicles. The ROI of our Skid Plates can pay for themselves in one traffic stop.

*Contact a Pro-gard customer service representative for vehicle availability

Seat Organizers

Keep paperwork, handcuffs, flashlights, and other small duty gear secured within reach and easy to find with Pro-gard's Seat Organizers.

- Lightweight ABS, portable design features adjustable straps that adapt to any seat
- Non-reflective finish prevents glare
- Mounts to any flat surface; easily moves between car, home, and office

Trunk & Cargo Area Organizers

Pro-gard offers Trunk and Cargo Area Organizers that are designed to take advantage of the spare wheel area which is often an underutilized space in police vehicles. We also offer Universal Organizers that fit almost any vehicle.

- Lightweight ABS construction is extremely durable for storing heavy and even sharp objects
- Shells are made of durable ABS material that is both heat and cold resistant
- Hinges offer easy access to stored gear without having to remove lids
- Removable storage dividers allow officers to pick and choose how to arrange/store their gear
- Vehicle specific organizers are designed to fit the unique contours of the vehicle's spare tire well
- D3805 Universal Trunk Organizer can be used with or without the lid and fits most applications

Weapon/Storage Drawers

While SUVs are gaining popularity as patrol vehicles, they lack the ability to conceal weapons in a manner that a sedan trunk offers. Pro-gard has developed the perfect solution with our locking Weapon/Storage Drawer.

- Mounts below driver's field of vision and will not impede rear window visibility
- Drawers can be mounted with or without our Cargo Barriers
- 11" of clearance space underneath for easy access to the spare tire well compartment / load floor
- PVC bumpers contour to cabinet edges to protect corners from splitting
- HDP composite panel doors are sturdy and impact resistant
- Sturdy MDO construction is rugged and moisture resistant
- Customizable foam liner secures weapons and other contents during travel
- Easily accommodates up to 40" weapons
- Programmable, combination Simplex lock

Shown in Ford PI Utility

Shown in Chevrolet Tahoe

Shown in Ford PI Utility

SUVs are quickly becoming standard patrol vehicles and storage solutions are a must. Segmenting cargo space with storage options provides your officers with a safe and organized means to secure duty gear and weapons.

- Tops are finished with a Lonseal® liner is easy to clean and provides a tacky surface for gripping loose items
- Large, easy access storage bins are perfect for storing oversized gear and equipment
- Standard file size drawers accommodate paperwork or duty gear
- PVC bumpers contour to cabinet edges protecting corners from splitting
- HDP composite panel doors are sturdy and impact resistant
- Sturdy MDO construction is rugged and moisture resistant
- Choose either horizontal or vertical gun rack option in our Tahoe Cargo Cabinets
- Gun racks are equipped with 8 second timers, momentary switches, and locks to secure your weapons
- PI Utility Cargo Cabinet features weapon drawer with programmable Simplex lock to secure items like weapons or electronics

Trunk Trays

Extended Trunk Tray shown in a Dodge Charger

Stowed Trunk Tray shown in a Dodge Charger

Our Sedan Trunk Trays offer both a storage platform and an electronics mounting surface that retracts into the trunk. The perfect solution for keeping loose equipment or wires free from entanglement when officers need to access other items stored in the trunk space.

- Suspended mounting style drops from the speaker deck, thus no support bracketry obstructing storage space beneath the tray
- Multiple holes on mounting brackets creates flexibility in selecting the mounting distance from speaker deck

- No holes drilled mounting, uses existing OEM slots and holes for a quick and easy installation
- Easy glide track with full extended-length ball-bearing slides, tray can fully extend for easy access
- Tray locks firmly into the closed position even with driving vibration
- Exceeds 100 lbs. weight carrying load
- Durable, black powder coated steel resists corrosion

Gun Rack Overview

Step 1

What vehicle will the Gun Rack be mounted in?

What Vehicle?

Step 2

What area of the vehicle will the Gun Rack be located in?

What Location in the Vehicle?

Step 3

What Weapons?

There are many different weapons available to officers these days. Since each Gun Rack is laid out around aspects of the specific weapons that will be housed in the rack, it is very important to let us know what the weapon type, manufacturer, and brand are at the point of ordering.*

click on listings to jump to product listing on pro-gard.com

Officers need to have their weapons handy when the situation demands. They also need to know that their weapon is secure for when they don't need it. Pro-gard offers a wide variety of Gun Racks to meet the needs of your officers on the road.

All Gun Racks come with a momentary switch and 8 second timer as well as the choice of key override styles (handcuff, vending, or straight).

Tri-Lock Weapon Mounting Systems

This system can secure up to three weapons: two long weapons in a vertical position and a hand gun in our unique hand gun lock box.

Partition Mounts

Our most popular mounting option, we offer three styles of Gun Mounts to choose from to match agency preference.

Available in our original Gun Rack designs as well as, our unique Tri-Lock Weapon Mounting System for Partition Mounts.

Step 4

Which Lock Override?

Pro-gard offers three types of key override for agencies to choose from: Vending Key, Straight Key, and Handcuff Key* (shown left to right)

Cargo Cabinets & Weapon/Storage Drawers

As SUVs have increased in popularity, Pro-gard has added these products to the Storage and Organization product line that offer advantageous locations for securing weapons as well.

Pro-clamp Roof Mounts

This is the ideal Gun Rack for agencies that do not utilize Prisoner Transport Partitions and want a less conspicuous Gun Rack mounting location.

Universal Mounts

Occasionally, agencies need to mount weapons in less popular locations. We can easily accommodate most requests as long as we can garner at least 6" on a straight plain.

Self-supporting Mounts

This is the ideal Gun Rack for supervisor and detective vehicles that do not utilize partitions.

Available in our original Gun Rack designs as well as, our unique Tri-Lock Weapon Mounting System for Self-supporting Mounts.

Step 5

What Accessories?

The final step for Pro-gard to manufacture your custom fit Gun Rack is to identify any and all aftermarket accessories that will be attached to each weapons. Given the wide variety of options available, there are literally countless configurations that can be accommodated. As a rule of thumb, we always need 3" of free space on the forearm to accommodate the locks.*

*Tri-lock Weapon Mounting Systems do not require this step

Tri-Lock Weapon Mounting Systems

Partition Mounts

An officer's weapon is a necessity in their daily job. Most officers find that adding weapon accessories greatly enhances their ability to effectively wield their weapons.

Weapon manufacturers have stepped up to the accessory demands and now offer numerous options in lighting, scopes, grips, lasers, and more.

Look at any officer's weapon and most likely you'll find at least two or three common accessories. Look at the broad spectrum of weapons within many departments, you'll rarely find the same configuration of accessories on any gun.

Providing a weapon mounting system that offers quick and ready access while giving officers total flexibility to utilize the accessories of choice has not been an affordable, easy solution - until now.

Pro-gard now offers the Tri-Lock Weapon Mounting System that offers the ultimate flexibility for mounting a wide range of options in weapon style, brand, and accessory with ease!

The Self-supporting Mount is a great alternative for vehicles that do not utilize Prisoner Transport Partitions

Self-supporting Mounts

- Partition Mount - mounts vertically on all of Pro-gard Partitions, requires a Partition Recessed Panel for mounting
- Self-supporting Mount - mounts over transmission hump, "No holes drilled" (for vehicles without partitions)
- Durable, black powder coated steel finish resists corrosion
- Available for either single or dual long gun mounting and one hand gun
- Locks and guards configured at point of install around weapon and accessories
- Does not require the use of our "Gun Rack Order Form"
- Choose from three different styles of gun lock override keys for the long guns: straight, vending, or handcuff, Locking Hand Gun Box is keyed separately
- Each rack comes with a momentary switch and 8 second timer for the long guns to give officers quick access when they need it

The Partition Mount has long been Pro-gard's most popular Gun Rack option for the police cruiser

Partition Mounts

Mounting the weapons on the Partition offers a secure location for the guns that is within easy reach when needed and still leaves room for an aftermarket console

Locking Hand Gun Box

Unique to the Tri-Lock System is our Locking Hand Gun Box that secures a hand gun.

This locking box is the perfect solution for patrol officers who need to lock their weapon while processing prisoners but want to avoid the hassle of "checking-in" their gun.

Patent Pending Design

Pro-gard's most popular mounting style of gun racks is the Partition Mount. Offered in three styles, guns are within easy reach of your officer when they need quick access to their weapons.

Also available in Tri-Lock Weapon Mounting System
