

# Law Enforcement & Corrections

# ProKure™ G The 4-in-1 Solution

## Controls Odor-Causing Bacteria, Mold, Mildew, and Chemical Odors

The **ProKure G** line of products generate powerful gas that attacks odor causing bacteria, mold, mildew and chemical odors (including harmful VOC's) without generating any hazardous residues. **ProKure G** is a powerful oxidizer and physically changes the chemical make-up of odor causing compounds; these odors will not reoccur, unlike when using an odor masking agent.

### ProKure G Fast Release

ProKure's patented pouches release a powerful gas upon contact with water and changes unpleasant smelling environments within approximately 4 hours of activation. Perfect for unoccupied cars, trucks, prisoner transports, buses, mobile command centers, storage units and large containers. Deodorizes gear, including body armor. Two sizes available for up to 1,000 cubic feet and 2,250 cubic feet spaces.

### ProKure G Slow Release

These pouches generate ProKure gas with exposure to humidity in the air for up to 30 days. Great for storage and waste containers, sewage systems at manhole covers, and grease interceptors to control big odors. Two sizes available for up to 1,000 cubic feet and 4,000 cubic feet.

### ProKure G Eliminates

ODORS	
Mold	Mildew
Human Waste	Sewage
Animal Waste	Garbage
Perspiration	Food
Chemical	Many Others

Please read and follow the EPA Label and Protocols prior to use.

Approved for use under the Environmental Protection Agency (EPA) registration 87508-3-89334

Add **ProKure V** liquid products for additional disinfection and deodorization needs.
