2020/2021

FLAME-RESISTANT STATION WEAR

Workrite®

FIRE SERVICE

THE FUTURE OF PROTECTION IS FR.

Firefighters deserve a uniform that puts forward the same level of dedication as they do. That's why Workrite® Fire Service delivers protection without compromise. Our station wear garments offer an added layer of NFPA® 1975-compliant flame-resistant (FR) protection with features that go beyond providing comfort to ensuring confidence. We are Workrite, the recognized leader in FR station wear. Now powered by Bulwark® Protection, we offer over 300 years of combined experience in FR and exclusive access to the most extensive FR education and training in the industry. The next generation of protection starts now.

WASH CODES

Do not use bleach, hydrogen peroxide, starch or fabric softeners on any Workrite garments. Please visit Workrite.com for complete laundry instructions.

HW

HOME WASH:

A laundering process normally defined as washing in a residential type top- or front-loading unit followed by tumble drying. Detergents used in this process are formulated for home use and are readily available on the consumer market. Refer to garment label for specific care instructions.

IL-LS

INDUSTRIAL LAUNDRY - LIGHT SOIL:

This less aggressive (industrial) laundering process is commonly used on uniforms which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140° F and pH to 10.5 max.

NFPA® 2112 COMPLIANT

Bulwark® Protective Apparel offers flame-resistant protective garments that are certified by Underwriters Laboratories to meet the requirements of NFPA 2112 – Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire, 2018 Edition. NFPA 2113 – Standard on Selection, Care, Use, and Maintenance of Flame-Resistant Garments for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire, 2015 Edition, requires that garments cover the upper and lower body and flammable underlayers as completely as possible. Bulwark garments meet this requirement either as a single garment such as a coverall or when worn with another certified garment such as a shirt or pants to provide both upper and lower body coverage.

Throughout this catalog, Nomex® IIIA will now be called Nomex® Essential*. While the name may be changing, please be assured that the properties and performance of these Nomex® solutions will remain the same.

THE IMPORTANCE OF FLAME-RESISTANT (FR) STATION WEAR

For many industries, flame-resistant (FR) clothing has been widely adopted as a means of protecting employees from burn injury or even death. However, while the fire service community takes firefighter safety very seriously, it's estimated that only a quarter of fire departments require flame-resistant station wear. Instead, the majority are wearing either cotton or synthetic uniforms underneath their turnout gear. FR station wear should be considered an integral part of every firefighter's personal protective equipment (PPE) – clothing designed to be worn continuously in designated locations where intermittent exposure to radiant heat and flame is possible.

IF I ALREADY WEAR TURNOUT GEAR, WHY DO I ALSO NEED FR STATION WEAR?

The proper selection of PPE is very important, and it doesn't stop at your turnout gear. A systems approach: building your PPE from the inside out, is essential in maximizing fire fighter safety. Stationwear and the material from which it is made has the potential to contribute to fire fighter burn injury.

Ultimately, under today's conditions, firefighters fight fires about 10% of the time. The other 90% of the time they're called on for nonfire hazards and technical rescue responsibilities, including roadway incidents, vehicle extrication, medical emergencies, hazmat, urban search and rescue, high/low angle rescue, swiftwater rescue and flood rescue. For many of these responses, typical structural PPE is not utilized or may be doffed mid-operation. However, the threat of an accidental thermal incident may still exist, making FR station wear a critical layer of protection for firefighter safety.

CHOOSING THE RIGHT STATION WEAR

COTTON

Unlike FR fabrics, cotton, although acceptable under NFPA® 1975, is a fuel and can ignite if exposed to an ignition source, ultimately contributing to firefighter burn injury.

SYNTHETICS

Although synthetic or synthetic blend fabrics are not compliant with NFPA® 1975, for many fire departments uniforms made from synthetic fabrics are still the station wear fabrics of choice. Unlike FR fabrics, synthetics easily melt, drip and can unnecessarily add to firefighter injury.

FLAME-RESISTANT CLOTHING IS:

- Engineered to self-extinguish upon removal of the ignition source.
- Made from natural or synthetic fabrics, like other clothing.
- Designed to limit (not eliminate) burn injury.
- Made to provide an additional layer of protection when incorporated with primary PPE and a minimal layer of protection when worn as the outermost layer.

FOR MORE INFORMATION VISIT WORKRITE.COM

Workrite® Fire Service is proud to have joined forces with the world's most trusted FR and PPE brands, Bulwark® Protection. Seeking the ultimate selection of uniform looks, lines and labels? Looking for apparel advances that better solve your team's biggest problems? Hungry for the latest information, advice, training and guidance? Workrite Fire Service, powered by Bulwark Protection, is your one-stop safety solution. For more information, contact your Workrite Fire Service representative.

The background of the advertisement is a close-up photograph of a fire truck's emergency lighting system. It features a horizontal light bar with a central section of orange-tinted lenses and chrome end caps. Below the bar are several rectangular amber-colored lights with chrome housings. The image is overlaid with a large, diagonal, semi-transparent orange shape that cuts across the frame from the top left to the bottom right. The text is positioned on a dark blue rectangular area in the lower right corner.

SHIRTS

Flame-resistant station wear shirts that offer superior quality, safety, durability and performance. Unquestioned FR protection that stays as true to its color as it does to meeting your daily station wear needs. A selection of styles and fits for everyone in the firehouse.

SIZE INFORMATION

SHIRTS

Important! Order shirts based on your chest size and sleeve length. For a roomy fit, please order shirts one size (2 inches) larger than your chest measurement.

	STOCK CHEST SIZES	SLEEVE LENGTHS		
		SHORT	REGULAR	LONG
S	36	30	32	34
	38	30.5	32.5	34.5
M	40	31	33	35
	42	31.5	33.5	35.5
L	44	32	34	36
	46	33	35	37
XL	48	33.5	35.5	37.5
	50	34	36	38
2XL	52	35	37	39
	54	36	38	40
3XL	56	37	39	41
	58	38	40	42

Specify chest size and sleeve length. Measurements may vary by style.

OUTERWEAR

Important! Order the garment size that corresponds with your measured chest size.

STOCK CHEST SIZES	GARMENT SIZES
34 to 36	SMALL
38 to 40	MEDIUM
42 to 44	LARGE
46 to 48	X-LARGE
50 to 52	XX-LARGE

Specify garment size.

PANTS

Important! Order pants based on your waist measurement.

STOCK WAIST SIZES	INSEAM
28 29 30 31 32 33 34	Up to 34"
35 36 38 40 42 44 46 48 50	Up to 36"

Specify waist size and inseam length.

HOW TO MEASURE

CHEST:

Measurement should be taken around the fullest part of the chest with the arms down, just under the arms and across the shoulder blades.

SLEEVE:

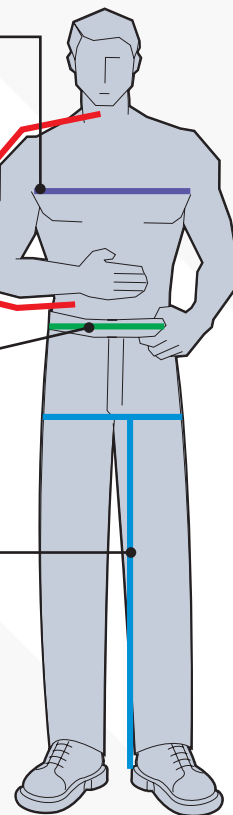

With elbow bent, measure from the center of the neck (back side) to the elbow and over to the wrist.

WAIST:

Measure around the waist (not pulling tightly) at the height you prefer to wear the waistband.

INSEAM:

Take a pair of pants that fit you well and measure from the crotch to the bottom of the leg.
