

## VARIABLE ANCHOR STRAP

Our Variable Anchor Strap differs significantly in design and performance from other adjustable anchor straps. By using an additional length of web, it can handle a higher load before slipping. It adjusts from 91 cm (3 ft) to 213 cm (7 ft). The D-ring on one end is larger so the other end can pass through, allowing the strap to be rigged in a choker (girth hitch) configuration and still be adjusted. The high strength, quick adjustability and variable length make this strap a jack of all trades. Sewn-on web keeper allows for improved organization when stowed.

Note: We recommend using a Delta Quick Link connector (part #382121) to prevent possible tri-axial loading of a carabiner when used in a basket configuration.

### Strength Specifications for Blue and Black Web:

Basket (U) Configuration: 52 kN (11,690 lbf)

Choker Configuration: 29 kN (6,519 lbf)

End-to-End Configuration: 20 kN (4,496 lbf)
