

CMC/ROCO WORK-RESCUE HARNESS™

When time is of the essence, donning a harness shouldn't slow you down. Thanks to its innovative no-step design, the new CMC/Roco Work-Rescue Harness™ is extraordinarily fast and easy to don. Contrasting color distinctions on interior and exterior padding expedite the process.

The unique design provides wraparound comfort and breathability, cradling the wearer with an ergonomically formed Jack Back™ and waist and leg pads that feature contoured and molded ventilation channels. The coat-style of the harness entry prevents possible contamination of the waist belt and leg loops from footwear, since there is no need to step through or over the harness to don or doff.

Aluminum hardware helps to make this harness remarkably lightweight. Designed to not open when loaded, the aluminum ANSI-rated AustriAlpin Cobra™ quick-release buckle are fast to connect and disconnect.

The Work-Rescue Harness offers the perfect balance of donning/doffing speed, lightweight materials, and overall comfort for rescuers, rope access technicians, tower climbers and other rope professionals working in the demanding vertical environment.

- Two ANSI Z359.11 certified lanyard parking loops at chest
- UL Classified – NFPA Class III and ANSI Z359.11
- Made in USA of domestic and foreign components

Option	Small
Item	202672
PRODUCT WEIGHT	2.3 KG (5.1 LB)
SIZE	SMALL
WAIST SIZE	66 – 76 CM (26 – 30 IN)
