

Fire Helmets

Comfort, Heat Protection
& Impact Resistance

Customized, high-performance helmets that are always...ready for action.

KEY LION HELMET INNOVATIONS AND FEATURES:

- LION's nine-point configuration and **patented Center of Gravity™** technologies provide the ability to custom-fit each helmet to the wearer's head – for greater comfort and protection
- **TherMax™** technology provides thermal protection and ensures a safer, stronger helmet that holds up run after run
- **Resin Transfer Molding (RTM)** allows for superior, long-lasting strength
- **LeatherGlass™ one-piece construction** on American Heritage helmets offers superior strength and durability during extreme conditions
- LION is the **ONLY** fire helmet manufacturer that can make a helmet in **ANY** color, offering a wide range of fiberglass helmet color options. Additionally, the color is molded through and through, so it will never chip off
- Helmets can be purchased with either **faceshields** or **goggles** certified to meet NFPA Standard 1971
