WHAT FIREFIGHTING
LEGENDS
ARE MADE OF.

High-Performance Fire Helmets

LIGHTWEIGHT CONSTRUCTION. HEAVYWEIGHT PROTECTION.

Lightweight Construction. Heavyweight Protection.

Built strong to last long using state-of-the-art composites to form the lightest, strongest American Legend fiberglass fire helmet EVER, keeping you ready for action.

Advanced materials and smart design keep the stress load down, but remain “heavyweight” when it comes to taking a hit, thanks to our strong as hell shell and impact cap system.

Durable, Matte Finish Shell

Impact-resistant distressed finish shells with through color means the look you want remains during the life of the helmet. Want high gloss? Coming in 2023, we can FR paint in standard colors (Black, Red, Yellow and White) as well as Blue, Orange and Green.

Lowest Profile Traditional

The lowest profile traditional helmet you can find means you feel balanced and secure without added height that interferes with your ability to move quickly. **Patented Center of Gravity™** adjustment system lets you set to your liking and keep positioned in place – save the wiggle and the wobble for the dance floor.

QuickClean™ Soft Goods

Featuring NEW easy-to-remove **QuickClean** soft goods system designed to encourage frequent laundering because cleaner gear is safer gear. The entire suspension system can easily be removed (we designed our mesh wash bag to fit it all, saving you the time and hassle of removing small pieces). An available “second set” soft good kits mean no excuses when it comes to cleaning your act up.

Unmatched Size Range

Fits the **LARGEST** range of head sizes in the market: 19-27” (Smaller than the traditional smallest hat size of 6-3/8 AND extending well beyond the largest 8-3/4) to ensure proper fit.

Full Line Eye Protection

Now offered with NFPA1971 compliant flip downs, giving you a full range of approved options to meet all your eye protection needs. Choose from NFPA 1971 compliant faceshields, goggles, integrated goggles, or flip downs.
